Saw you walking down the street with your brand new  
bo  
Now's there's something you might know  
It's a dirty dog don't mean no good and leave you out  
in the cold  
Lies and cheats  
That's what I've been told

You're getting in too deep  
Love before you leave  
Put him out of your mind  
Put him out of your mind

Oh I could do so much for you and always be around  
I'll treat you right not like that earl crown  
Cause he is the one who make you blind, leading you a  
stray  
But I'm the one to help you find the way

You're getting in too deep  
Love before you leave  
Put him out of your mind  
Put him out of your mind

Now all is fair in love and war so the people say  
Keep you cool he only wants to play  
You better watch out be on your guard  
Or get your fingers burned  
What a spill of girls who never learned

You're getting in too deep  
Love before you leave  
Put him out of your mind  
Put him out of your mind
