One's for now, one's for later
Light it up bud, later alligator
I'm outta here
Got to get out, to keep gettin' into it
Look at this world, man
We've been livin' it
Let's get outta here
Here we come, a revolution
Close your eyes and feel
Don't need a problem for solution
Just do what you feel
White collar likes, tellin' you where it's at
Makin' your blood boil, givin' you a heart attack
Havin' your good time, cussin' on the telephone
Kickin' in the back door
Honey I'm home, AW! YEAH!
Here we come, a revolution
Close your eyes and feel
Don't need a problem for solution
Just do what you feel
