Astral transfixions bring forth dimensional mindscapes  
Spectral visions illuminate from the dark void  
I descend to a subconscious netherworld, I drift among  
the ancestry of ancient ones  
Staring through the dim-lit mirrors of unseen reality, I  
discover secrets of afterlife passage

Crossing through a barrier of interdimensional  
subconscious  
Hymns of untold philosophies break the silence  
Swallowed by internal visions of creation, I've become  
entranced by ruins of fantasies  
Winds of obscurity levitate me over mountains of fire  
I've entered a realm where i exist yet never have  
before

Crossing through a barrier of interdimensional  
subconscious  
Hymns of untold philosophies break the silence  
Swallowed by internal visions of creation, I've become  
entranced by ruins of fantasies
