Hey I know your game
I know you need me
Say isn't it great
I'm always here
I, as in I
As in the one in front of you
I, I never lie
I'll make sure that you're alright

Goldrush
Everyone wants some of that stuff
It's the cure but you can't get enough
Go on have another
I think you'll discover
You may never recover

Who can you trust
I'm always watching
I'm the one you love
The one you can't get rid of
We, like you and me
It's you and me
Please, you'll never leave
What would you do without me

Goldrush
Everyone wants some of that stuff
It's the cure but you can't get enough
Go on have another
Goldrush
Everyone wants some of that stuff
It's the cure but you can't get enough
Go on have another
I think you'll discover
You may never recover

You can hear me on the radio
I'm sitting in the back seat of your car
I'm inside your engine
I'm keeping it running
Are we getting physical
Don't touch me I'm invisible

My hand's in your pocket
My numbers in your wallet
And I'll make sure you call it
To get that old rush
I know you want it

I know you do
I know that you've been calling
Now I'm coming to get you
You know who
Will catch you when you're falling
I can pick you up
Goldrush
I can pick you up
Oh the rush
I can pick you up
Pick you up into the

Goldrush
Everyone wants some of that stuff
It's the cure but you can't get enough
Go on have another
I think you'll discover
You may never recover
You may never recover
You may never recover
You may never recover

I don't mind the rain or shine
I always have a better time
I'm tip-top shape when I'm with you
I'm tip-top, tip-top
Time flies tick-tock
I'm tip-top shape when I'm with you
