It's not me and you

It's not me it's you

The records say you know it they don't love you like I do

Say you're moving on well I guess that's just the motion

I guess that's just the motion oh-oh I guess that's just
the motion oh-oh

I guess that's just the motion oh-oh

I guess that's just the motion

I guess that's just the motion

I don't have a fuck to give

I've been moving state to state

In my leather and my tims like it's 1998

And my dog chubby chub, that's my nigga from the
way

On the east side of the city that's where everybody stay

Seem like everybody calling cause they want me on
they song

It's like every time I touch it I could never do no wrong

When they need a favor from your man they don't
leave you alone

But I guess that's just the motion

Then that phone doesn't ring when they got everything
that's the motion
oh-oh

I guess that's just the motion oh-oh

I guess that's just the motion yeah

Lookin back on it at least my pride is intact

Cause we said no strings attached and I still got tied up
in that

Everything that I write is either for her or about her

So I'm with her even when I'm here without her and she
know it

The girl that I wanna save is like a danger to my health

Try being with somebody that wanna be somebody else

I always thought she was perfect when she was being
herself

Don't even know how to help

But I guess that's just the motion

She'll probably come around, soon as I settle down,

That's the motion oh-oh

I guess that's just the motion(9x)
