welcome to modern times, i hope that you like it here  
a celebration of your life, with caviar and kegs of beer  
you said wait until tomorrow, well i thought you were  
wrong  
when you said someday we'd be together, i never knew  
it'd take so long

so take your time, I'll be waiting here and i don't mind  
hoping one day i would here you say, that tomorrow is  
today  
hope tomorrow is today, and whenever you go  
it get's me started, oh whoaoh, it get's me started

i read it in the London times, aren't you glad to here  
the news  
a face that loves a thousand rhymes, but never really  
speaks the truth  
says the world will end tomorrow, well i hope they are  
wrong  
and how could we ever be together, if tomorrow never  
comes

so take your time, I'll be waiting here and i don't mind  
hoping one day i would here you say, that tomorrow is  
today  
hope tomorrow is today, and whenever you go  
it get's me started, oh whoaoh, it get's me started

take your time, cos i don't mind  
will you say, tomorrow is today

take your time, I'll be waiting here and i don't mind  
hoping one day i would here you say, that tomorrow is  
today

so take your time, I'll be waiting here and i don't mind  
hoping one day i would here you say, that tomorrow is  
today  
hope tomorrow is today, and whenever you go
