M: Beretta/L: Beretta, Cappellari

"War!" is the word on all lips after a century of peace
Fires burnin' into the night, soon clouds will cover the
sky

[Bridge 1:]

We stand together now to face the evil hordes
Marching united, we're drawing our swords

[Chorus:]

This is our vow

We'll never bow

Maybe we're all gonna die...

But we fight!

Death is what you see on the ground, look at the fields
around

Screams are the only sound, crossing the shields we
shout

[Bridge 2:]

We're still together but we're falling one by one

A god is on their side, our power's not enough

[Chorus]

Silence is fallin' around, covers the land like a shroud
Too quickly Eridan falls, we're not so strong or so
bold... Now

[Bridge 3:]

We stood together, knowing not it was in vain

So many warriors have died along the way

[Chorus:]

This was our vow

We'll never bow

Maybe we're all gonna die...
