Put new strings in my guitar to pass the real time  
Getting stoned with my brothers friends  
Tellin' all of mine that i'm fine  
I'm keeping the curtains closed so the world can't see  
in  
Disconnected the telephone to stop my friends from  
callin

And I just want to fall asleep  
But I always dream about you  
and It breaks my heart when I always dream about you  
Always dream about you  
So I'm smokin me cigarettes and drinkin 40 straight  
You got away baby, something had to take your place  
I feel allergic to the world, like some sort of disease.  
Tell me darling, on those lonely nights, do you think of  
me?

And I just want to fall asleep  
Cause I always dream about you  
But It breaks my heart when I always dream about you  
About you

Cause I always dream about you  
But it breaks my heart when I always dream about you  
About you
