You have no more messages

I am standing here alone

Looking out upon this world

Wishing I had never known

What love could do to this girl

I can't stop the rush of tears

As my heart tears from my chest

And I realize now, my greatest fear

Is torturous at best

When the night falls I will miss you

As the sky comes crashing down

And I'll pray that I can make it through

'Till day break comes around

Once, you were all I wanted

My love for you was all I owned

And now my world is forever haunted

As I sit here all alone
