Hello [x7]  
Hello, is there anybody up here?  
(Hello) Welcome 2085!  
Twenty Eighty-five that is (just me up here I guess)  
(OHH! [x2])The magic of the moment snuck up on me  
And caught me by surprise (OHHH! [x3])  
Roamin and I'm lonely man I'm longin  
For that somethin in your eyes (OHHH! [x3])

And I know it's not just the song  
(And I know it's not just the song)  
And I know it's not just the drink  
(And I know it's not the drink)  
But whatever it might be (Whatever it might be)  
Just keep holdin on to me  
(OOH!) Cause I'll pull down a cloud for you  
I'll circle the stars and bring you one back  
I'll walk through the sun for you  
Cause there's somethin you do  
That got me walkin on the moon  
(Uhh)There's something you do  
That got me walkin on the moon  
(Uhh)And I know that it's true baby  
You got me walkin on the moon

Girl don't keep me waitin, I'm impatient  
Hit my runway, and let's take off and fly  
Now I'm where I wanna be, come co-pilot with me  
Let's burn up the sky (OOHHH)

And I know it's not just the song  
(And I know it's not just the song)  
And I know it's not just the drink  
(And I know it's not the drink)  
But whatever it might be (Whatever it might be)  
Just keep holdin on to me  
(OOH!) Cause I'll pull down a cloud for you  
(Pull a cloud for you)  
I'll circle the stars and bring you one back  
I'll walk through the sun for you  
Cause there's somethin you do  
(There's something you do)

That got me walkin on the moon  
(Uhh) There's something you do  
That got me walkin on the moon (OHH!)(UHH! [x2])  
And I know that it's true  
Baby, you got me walkin on the moon

Everyone out there will know that you are my girl  
And my love will run in cirles around us girl  
(Ayy, ayy dream I'm too good at this)  
No matter what I do  
Uhh, uhh, uhh, I can't contain it  
No, no, no I can't restrain it  
There's a lot of stars in here ain't it  
But you shine so much they don't seem famous  
Whered you come from on this lonely night?  
I swear god musta made lightnin strike  
And I bottled it up, we hit the red carpet and modeled it  
up  
We hopped in the rari and thradoled it up  
Now everybody clappin, they bravoed it up  
All just because it's more than a buzz  
More than a drink, but I took a few sips  
And let it do what it does, now im drunk textin  
Like it's all about you, like I can't spend  
Another minute without you  
You know the drinks let you say things  
You ain't allowed to, things interfere  
But you're way to proud to say out loud  
Cause niggaz gonna clown you, put your blackberry  
down  
People is around you, I'll put my mackberry down  
I ain't tryin to hound you, just tryin to take you  
Where the stars gonna surround you  
And Uhmm, maybe ice down you,  
And Uhmm, maybe white gown you  
And Uhmm, maybe we should talk about all this  
After I pound you, you know I'm just playin with you,  
I know a lot of people mad cause they ain't with you  
Wait is it because we on the moon,  
Tell em, save the hate. We'll be home soon  
(Uhh were walkin on the moon)

Uhh, there's something you do,  
That got me walkin on the moon  
Uhh, and I know that it's true,  
Baby, you got me walkin on the moon  
Everyone out there will know that you are my girl.
