The uprising
Is quickly approaching
So grab your weapons
And head into battle
This reign of terror will come to a halt

And what they saw were explosions in the sky
Your presence demeans what is common
Living by no consequence has ended
Someone must pay for what was done
Someone must pay for all the blood

Let's take it back
To a state of nature
Let's see what unfolds

With no authority

Coming of age
Now I'm force-fed
No choice in the matter
Rational thoughts become obscure
In the mind of man

Look to the sky
Its got a present for you
Its safe to say
Its going to rain fire
