

Dream Evil

"Hail To The King"

Visit "[Hail To The King](#)" on MotoLyrics.com

I travelled through land, Through fire and pain with you
Together we fight, forever united my friend
We are bound by blood, we are brothers in arms
With thunder we ride with lighting we strike
United invincible force

Hail now hail to the king
With thunder and lighting we strike
Hail now hail to the king
We show them no mercy at all

I remember the time, when all you could feel was hate

You were poisoned with fear
And you lost everything that you loved
I reached out my hand, I taught you to fight like a man
With thunder we ride, with lighting we strike
United invincible force

I sacrifice my blood for you
I will always be by your side
Together we will never fail
So rise your sword in glory
