Featuring GangStarr]

[Chorus]

the life you is walking through

such a bitch

day in to day out the same old thing kid

[Verse 1 Spek]

bring me to the end and I'll be me

open up your eyes wide so you can see

it's thick to be me

how I kick my rhymes down pat

within the circle how we do

when we kick that fact

but where's the meaning?

I take it one night by one night

but where's the meaning?

I take it one day by every day

I pick a rhyme I chose and put it number one inside my
placement

so look to find the signs inside my basement

no tears

sell us full of samples with ample time to loop

it's just the beats from the dead from my head with my
troop

and it be cool if all the time was like studio time

but days are long enough for Spek with the rest of my
time

I think I'm manic depressive and not aggressive enough

you can try to be hard but damn you still won't be rough

life is whack for the ?? life is phat if you flow

life is waitin' for a deal when you like got no dough

[Chorus]

[Verse 2 - Spek, Lu]

in the middle of my nights I check my late night flicks

I'm up at night trying to write and late night I get my
kicks

that is I'm out to get my main feature

the low budget picture in my room and in between I
write scriptures

picture this the day's just a claender's notch

and every kid becomes the one who wanna ride it on
the crotches

and when I'm finished when my flick is almost done

when my rhyme is half done
when I check a late re-run
I lose to the groove soul sounds soothe me well
sometimes my mind wonders sometimes heaven could
be hell
I pass the fools who has never known my name
when I think about the deal sometimes I need someone
to blame
I add members to the show who knows a fan
for the ones that wanna capture the essence of level
to the hip-hop their directions they groke
who's representing us? the critics holy smoke
[Chorus]
[Verse 3 - Lu]
place text in images replacing old versions
documents displayed as homemade
glue without a clue you your loophole is deckin' in the
halls to ring
bells
in fear of losing clientels
my work place is infinite
but can't plan it like my screens appearance is
translusive
but with a hard ??? I display I cruhser critics
as easy as...
skip this step if you wanna
control key available to only keyboards you can't afford
Q he's the shift he's the roller
can't understand your education is basic (science)
so many words and everything is being said
yet people get pissed
when people wanna your way but not their way so which
way's the right
way
I'm going hungry in the belly of the beast
that uncleanes the serpent
I walk like the lion I'm a leash
[Chorus
