Visit "[Hello & Goodbye](#)" on [MotoLyrics.com](http://MotoLyrics.com)

You're standing with your friends  
All under control  
I can see it from here  
You don't wanna let go  
So I'm circling around  
And I'm keeping to myself  
Seems like everybody's here  
But there's nobody else

Who makes me want to stick around,  
Want to figure out  
Whatever would make you let us happen  
The moment it ours, open your heart  
Or we'll never know

If I told you we could last forever  
We could try to be something special  
But if we fell through, baby it would all be worth it  
Just to have met once in our lives  
Just to have said hello and goodbye  
Hello and goodbye

We've never said a word  
But there's a way you make me feel  
I can see it from here  
That you know I'm for real  
I want to know what you love  
Will you tell me about yourself?  
Not everyone can get to me like you  
And there's nobody else

Who makes me want to stick around,  
Want to figure out  
Whatever would make you let us happen  
The moment it ours, open your heart  
Or we'll never know  
If I told you we could last forever  
We could try to be something special  
But if we fell through, baby it would all be worth it  
Just to have met once in our lives  
Just to have said hello and goodbye

To a chance to be something  
'Cause nobody wants to be broken  
So you keep it all unspoken  
Hello and goodbye to the way that your feeling  
Don't keep it to yourself  
'Cause there's nobody else

Who makes me want to stick around,  
Want to figure out  
Whatever would make you let us happen  
The moment it ours, open your heart  
Or we'll never know

If I told you we could last forever  
We could try to be something special  
But if we fell through, baby it would all be worth it  
Just to have met once in our lives  
Just to have said hello and goodbye  
We could last forever  
We could try to be something special  
But if we fell through, baby it would all be worth it  
Just to have met once in our lives  
Just to have said hello and goodbye
