No I don't believe the things you tell me  
I don't believe the things you say are really true  
And I ask you ask me what it is I've said to turn you  
What you lean seems far from here

Do you really not hear me saying  
Do you really not have a choice  
Just as big as a hundred thousand  
Just as sure as I have a voice  
No I won't accept placebos  
No I won't accept your lies  
I will not let you burn me  
No I don't believe your way of getting even  
You're just wrong  
And I can't break through this gray faÃƒÂade, your  
mask protects your very well  
It's always on

What's wrong with you woman  
Is there something you won't say  
Your silence makes me crazy  
And it's breaking me with pain  
No I won't accept placebos  
I won't accept your lies  
I will not let you burn me
