Highest buildings burn down  
When no one seems to care

Don't let it go,  
Don't let it go too far  
Who do you think you are?  
You don't even know

Black rain will crash to the ground  
And the poison will fall from the apple trees  
As the devil walking among us  
Lifts his hood and smiles.

You think you've seen hell?  
You don't even know.

Watch your back little boy  
Watch your back little boy, now watch.

Life sure does suck when your sinful desires fall down.
