And I came with my eternal wrath  
When shadows reached, the light feared and receded?

From the sky came damnation with dark  
In the uncertainty of time, with the formation of  
catastrophe  
Their dreams turned virtually to nightmares  
In the limitlessness of time, were they enslaved to all  
but vanish!

?a new epoch began;  
Enchanting chaos of my frozen mind!

I gave them the catastrophe they can never even  
dream!  
They were all doomed in vicious circle  
In the sea of their own contradictions shall they vanish!  
With patience waited I in hatred of ages  
And now it's the epoch of my wrath!

Catastrophe occurred and ended:  
They were drowned?in their contradictions  
Vanished?with their nothingness  
Died?all alone

?I toast for the sky that light shan't ever rule again!
