Let's go, let's go  
Come on baby let's take this from the top  
I know, I know  
We can make, just don't tell me to stop

You're my hero  
You never used to say let's give it up  
I won't let go  
One more time you know we got enough

We're falling down, whoa, oh, oh

This isn't the first time, you won't be the last  
Tonight I'm coming for you girl  
This isn't the first time, you won't be the last  
This city has almost got you burned

This town will be your final grave  
This town will never let you leave  
This is the annihilation  
This is the celebration

This isn't the first time, you won't be the last  
Tonight I'm coming for you girl  
This isn't the first time, you won't be the last  
This city has almost got you burned

This isn't the first time
