"We Win"

Someday you might find, that victory,
Is well worth the bitter fight,
But you've got to give it a try,
You've got to want to deny - the enemy,

We win, we win, we win, we win, yeah we win, [x4]

There were days they pushed us around, for all to see,
But we brushed it off and got up from the ground,
When you've got a chance at the crown,
Will you be the one to back down? No,

We win, we win, we win, we win, yeah we win, [x4]

The moment when you hit your stride,
Blood and tears been cast aside,
Iron will can't be denied,
We're done waiting for this moment,

We win, we win, we win, we win, yeah we win, [x4]
