Peace has lost its meanin'  
Now, we've hit the ceilin'  
All is said and all is done  
Here goes, start again

You're better than you think so  
Something I hold onto  
I'm better too, holding on to you  
Start again

So, meet me and we'll drive this car away  
We can leave right now, what do you say  
We'll head out for the wide and open spaces  
If we can clear the way

Save yourself, don't save me  
Save the one you may be  
Let it be the best that it can be  
Start again

So, meet me and we'll drive this car away  
We can leave right now, what do you say?  
We'll head out for the wide and open spaces  
If we can clear the way

So, meet me and we'll drive this car away  
We can leave right now, what do you say?  
We'll head out for the wide and open spaces  
If we can clear the way

So, meet me and we'll drive this car away  
We can leave right now, what do you say?  
We'll head out for the wide and open spaces  
If we can clear the way
