"Memories"

Visit "[Memories](#)" on MotoLyrics.com

I'll find a way to my memories
Where hope is stuck somewhere deep down
I'll find the way to my memories
If I can find a path will be found
I'll let you have my crown

I will go down in history
For all the things I've said and I have done
If I can find a way to love
If I find a way to control
If I find a path I will reedem myself
And find my memories

Can't live my life through the memories
I will not be narrow-minded at all
You shall enter this kingdom as a child
Or you shall not enter it at all
You should stay and take the fall

I will go down in history
For all the things I've said and I have done
If I can find a way to love
If I find a way to control
If I find a path I will reedem myself
And find my memories

Regain our faith (Memories)
In our unspoiled (Memories)

Yes, I will go down in history
For all the things I've said and I have done
If I can find a way to love
If I find a way to control
If I find a path I will reedem myself
And find my memories
