Remember Valentina? I couldn't bring her back
Got off track
Her faith in love stopped, and left her broken
Her Lucy pushed her to madness
She forgot that freedom is her own
Ohh ohh

Please make me fall
Yeah
Please make me fall, ohh
Yeah

The Operation used her, choked her, spit on her
dreams and left her dying
Walked through the dark standing all alone
Descending to the unknown
Ohh ohh

Please make me fall
Yeah
Please make me fall, ohh
Yeah
[x2]

It takes will, takes will to be truly free
I watch my angel as she's falling to her knees
It takes will, takes will to truly see
I watch the angels fall like apples from a tree
It takes will
[x3]
