"I Am Death"

Visit "[I Am Death](#)" on MotoLyrics.com

Death - the anti-hero, champion of the doomed
I'll be there to end your life, to take you to your tomb
I will seal your fate, before me you'll decay
There's no escape, your soul is gone - I'll steal your life
away

I'll end your suffering, I'll end your pain
When you take your final breath - then you'll know my
name...

I am death (death - death - death) x 4

I live within the hungry children on the streets
I'm the disease that kills you while you sleep
I am the needle that's in the junkie's arm
I am the tormentor - the storm before the calm

They call me the reaper - I am the man in black
When you give your life to me, there is no turning back
You will know the end is near - you'll see my toothy grin
Now you leave this life of hell, but another one begins...
