### "Still In Your Heart"

Visit "[Still In Your Heart](#)" on MotoLyrics.com

The night you met, it was a magic start  
All the connections were made in your heart  
Following you everywhere, you could feel her eyes -  
A glimpse of somebody, takes you by surprise

Another place and day, now where's she gone?  
You can't forget her face, or things you left undone  
Re-run memories from the start -  
The time has flown  
All the time you've been appart  
And she's still in your heart

Try as you might the recollections stay  
Like a photographic memory of each day  
You can feel her by your side in an empty room -  
And words like 'forever', you spoke too soon

Another place and day, now where's she gone?  
You can't forget her face, or things you wish you'd  
done  
Re-run memories from the start -  
The time has flown  
Where's end ending and the start?  
Is she still in your heart?
