Take me in the morning
Take me every night
Take me when you're feeling low
Take me when you want to stay

Take me, take me
Take me, take me, take me
Take, take, take

Before you slide into the wide
There's something I want you to know
What you see is what you want
In all your stretch of consciousness
You've still got a long way to go
What you want is what you need

Some make you spin, some make you sweat
Its only here for you to choose
And if you try, an alternative high
Then tell me what have you got to lose now

Take me every morning
Take me every night
Take me when you're feeling low
Take me when you want to stay
Up all night
Up all night

The hit, the hit, the hit to fit reality
It's just a state of mind
What you see is what you want
And you'll admit its more than
Just an axe that you've got to grind
What you want is what you need

We'll make a spin, we'll make you sweat
All you've got to do is use me
Some like it hot but I like it wet
So tell me what have we got to lose now.

Take me every morning
Take me every night

Take me when you're feeling low
Take me when you want to stay
Up all night
Up all night

A drug, it's a drug
A drug, it's a drug
A drug, it's a drug
A drug, it's a drug

A drug, it's a drug
A drug, it's a drug
A drug, it's a drug
A drug, it's a drug

Take me every morning, take me
Take me every morning, take me

Take me every morning
Take me every night
Take me when you're feeling slow
Take me when the mood is right

Take me every morning
Take me every night
Take me when you're feeling slow
Take me when the mood is right

Take me every morning
Take me every night
Take me when you're feeling slow
Take me when the mood is right
