Radiation plague,
Fallout rain laid earth to waste,
Year 2000 gone,
How could we not have known
Sun starts to die,
Nightfall wartorn landscape,
On all others stand
Pure-bred fucking madman

DNA is life,
Eugenic crop,
Humans god-like,
Created in a lab,
High-priced,
Perfect, flawless

Fall to your knees, your mind is fucking raped,
The domination breed, the perfect god damned race,
Spreading of the seed, perpetual disease,
Lies are all the same, dead and common place

Spitting in the face of god,
Annihilation interface,
Creation of a hell on earth,
Traces of your life erased

Machines are rolling over all the remnants of our
fucking lives
Obliterated cities are the monuments to genocide
Welcome to the century of paradise and unity,
Where bullets are the bible and everyone's the enemy

Eliminate the rest,
One brood, from the best stock,
Only to survive,
Initiates reproduction

You can't teach a corpse how to fucking live
You can't know the hate that drives the blood in them,
How can it hurt when you can not feel
Just close your eyes, a dream that's all too real

Let the dead fall in front of them,

Carry out the sentence handed down,
All dead again, cause they never get far
And it's always on to them,
Cut down while they run, terror eats the soul of every
man
Cyber corpses need to kill to justify their plan,
Human cattle fighting for a world they can't defend,
Never underestimate, paralyzed hope in quick decline,
Terminate the masses for the goal is death divine

They are the offspring and children of god,
Science is dead,
From human flaws,
Now they have conquered and slaughtered us all,
Through ethnic laws,
Weed out the weak,
Only their kind can live on

Demons are inside of me,
Disinformation leprosy,
Patriotic arrogance,
Eradicates intelligence

Soldiers are the children of the existential atom bomb,
Products of a paranormal suicidal vision-quest,
Subversive paranoia through a televised holocaust
Growth of insurrection causes massive unrelenting
loss.

Execute without a care, the war is lost in time,
Fucking let them die, modern day ape is on the rise,
Taking on the system that gave birth to test-tube life,
Now they are the tumor on brain desensitized
