All I wanted to  
Was to be with you  
Live inside your head  
And to kill you dead

Every time I see your face  
You know I softly die  
Every time I'm out of space  
You know I softly die

When I cut my hand  
And I break your heart  
And I make your life  
Just fall apart

Every time I see your face  
You know I softly die  
Every time I'm out of space  
You know I softly die

Every time I see your face  
You know I softly die  
Every time I'm out of space  
You know I softly die

Every time I see your face  
You know I softly die  
Every time I'm out of space  
You know I softly die
