Embrace your darkness
Let her veil soothe your soul

Embrace your darkness
Let her magic free your mind

Embrace the night
Let her darkness seep your vein

Embrace the night, my child
Let her twilight hide your pain

No one is going to love, no how
Only the darkness
Only the nighttime
You can't run away from your shadow

No one is going to save you, no how
Only the darkness
Only the nighttime
You can run away in your sorrow

Embrace yourself
Thank the sun for its burning rays

Embrace yourself
Thank the sky for its glorious grace

Embrace the night
Let her darkness be your light

Embrace the night, my child
Let her soul be your guide
