I wonder how you feel
When dreams begin dying
I wonder what will be
But here I am
With nothing left to do
But cry out for you
I'll never find a love
Like this again

The story is over
Like thunder and lightning
(It's gone between hope and believing)
The angels are leaving
And feelings keep fighting
(Oh baby can't you see it's all over)
The story is over
The party has ended
(The dreams we once dreamed are all dying)
The rainbirds are flying
The eagle has landed

Our love was meant to be
For ever and ever
I wonder how it feels
To be alone
The story of our love
We played it together
But now I've got to play
On my own

The story is over now
The story is over now
The story is over now
Oh babe it's all over now

The story is over now
The story is over now
The story is over now
Oh babe it's all over now
