Come follow me  
I've got all systems going nothing standing in my way  
I should be far down the road but I'm not  
Something's holding me back like a wild boar attack  
And I've got you by my side but you're not  
[Bridge:]  
Do you remember when we thought there was no end  
A shooting star around the sky  
Do you remember when you were from heaven sent  
How far the wind could make me fly  
[Chorus:]  
Angels crying, when you're far away from me  
Always trying, I will make you see  
Angels crying, (the angels cry), when you're far away  
from me  
No denying, (there's no deny), we were meant to be  
I tumbled from the sky where I was soaring so high  
Never thought that I could fall back to the ground  
Somewhere along the ride I found that we can't stop  
the tide  
It's time for me to buy another round  
[Bridge]  
[Chorus]  
Angels are crying  
Angels are crying  
Angels are crying  
Yeah  
I've got all systems going nothing standing in my way  
I should be far down the road but I'm not  
Something's holding me back like a wild boar attack  
And I've got you by my side but you're not  
[Chorus2:]  
Angels crying, (the angels cry), when you're far away  
from me  
Always trying, (I always try), I will make you see  
Angels crying, (the angels cry), when you're far away  
from me  
No denying, (there's no deny), we were meant to be  
[Chorus2]
