Stakka:

Have faith in me
I promise you
Whatever may be
Whatever we do

The final door
We see the light
But we still want more
The world is too bright

The time has come
We turn our backs
You're not the one
To be with
In the trinity

Camilla:
We lurched into the deepest night
As black as it may be
I seek to clear this clouded sight
So all of you can see

Stakka & E-type:
We could always lie
Could always try to turn them away
We could always sin
And when we win you will obey

Stakka:
We got upset
You rule the game
How can I possibly let
Us take the blame

What we used to be
what we usually are
There is nothing to see
We're past that by far

Our secrets remain
Between me and you

But I want to gain
I do what I am told to do

Camilla:
Into the pit I seek a light
To guide me on my way
The time has come to end the night
And now you will obey

Stakka & E-type:
We could always lie
Could always try to turn them away
We could always sin
And when we win you will obey
