"Set The World On Fire"

Visit "[Set The World On Fire](#)" on MotoLyrics.com

Fight the power
And the power will fight back
You're only as good
As the system you hack
If you become a problem
You will be replaced
Shut down
Erased

The world is capsized
Gone erratic
Cause you just won't reason
Dissolved into static
The truth is based
On misinformation
Reality is only
A hallucination

The revolution will be synthesized
The revolution will be synthesized

Another decade
Gone terribly wrong
Affectively effecting
Generations to come
We only buy into
What we consume
We only want to protect you
From yourself

The more you waste
For the media hype
We're busy creating
Them another stereotype
Amending the story
To keep it tact
It makes your lavation
A common-day fact

Kill those who control us
By pushing your button
The church and God will lapse on you

Does it matter?
Does it matter?

The revolution will be synthesized
The revolution will be synthesized
The revolution will be synthesized

Corporate wars
Versus plastic celebrity
Competing for headlines
Repels foreign realty
Uterior motives
In a shroud secrecy
The holy grail
Is a mark of supremacy

Killing machines
Blood destruction and mayhem
Can we pity the victims
If we don't even know them?
If anything goes wrong
We'll bring them all in
Cause when I give a straight
From the ancient hand

Here you go
We all get the treat
This is your washing
Get the truth you know
You're lying it's broken

The revolution will be synthesized
The revolution will be synthesized
