I've never see the sky like that  
I can't believe that it could do that  
I closed my eyes before the sun could set  
I slept and waited for my, waited for my

I waited for my dreams to land  
I waited for my dreams to touch down  
I waited patiently to hear the sound  
I waited for the song to get me out, to get me out of

And I was up above  
Watching myself crashing down  
Yes, I was up above  
Watching myself crashing down

I've never seen so many lights  
I've never heard so many voices  
No one will tell me how I ended here  
No one will tell me where, oh, tell me where, oh, tell me  
where I am  
Where I am

And I was up above  
Watching myself crashing down  
Yes, I was up above  
Watching myself crashing down  
Watching myself crashing down, down

Yes, I was up above  
Watching myself crashing down  
Then I was up above  
Watching myself crashing down  
Watching myself crashing down

Watching myself crashing down  
I'm watching myself crashing down
