

Earth, Wind & Fire **"Never"**

Visit "[Never](#)" on MotoLyrics.com

I can never, never, never, never
Live without you

Never wanna live without you
'Cause my life be incomplete without you so
I looked into the glass, ran ahead of time
Paid a million to the past, now I hope to find

I'll never have to live without you
And you'll love me like the day
When we first saw the sun
Shining bright behind the moon

When I'm in your presence
It fulfills my strong desire
As long I've been searching
Now I finally feel the fire

You gave me the love that
I've been needing for so long
You built me up when I was weak
And now I am strong

Nothing in this world
Creates a loving space
So nothing in this world can take your place

Never wanna live without you
'Cause my life be incomplete without you so
I looked into the glass, ran ahead of time
Paid a million to the past, now I hope to find

I'll never have to live without you
And you'll love me like the day
When we first saw the sun
Shining bright behind the moon

There's no space or time
Where our love exists
Eternal love that we have found
Is planted on a wish

Every morning when I wake
I see your lovely face
And all the things that cloud my mind
Are suddenly erased

Nothing in this world
Creates a loving space
So nothing in this world can take your place

Never wanna live without you
'Cause my life be incomplete without you so
I looked into the glass, ran ahead of time
Paid a million to the past, now I hope to find

I'll never have to live without you
And you'll love me like the day
When we first saw the sun
Shining bright behind the moon

Oh, what a wonderful journey we've traveled
Far, just to get to this place
And now, that we're here it's forever and ever
Love, just you and I

Never wanna live without you
'Cause my life be incomplete without you so
I looked into the glass, ran ahead of time
Paid a million to the past, now I hope to find

I'll never have to live without you
And you'll love me like the day
When we first saw the sun
Shining bright behind the moon
