Viewed from the darkest hole
Outward face looking up
Despair viewed down on, down on , down on
Marked by a deeper scar
Find the light i look for, look for, look for
These scars cause falls

I have need for outward
Do i have to wait?
Wait for this
I begin the long climb back on this rough terrain - long

Dragged down to a new depth
Balance lost again, again, again
These scars cause falls

I have need for outward
Do i have to wait?
Wait for this
I begin the long climb back on this rough terrain - long
