### "House Of Love"

Visit "[House Of Love](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Everybody  
Everybody in the house of love  
Hey  
Everybody  
Everybody in the house of love  
Hey  
Everybody  
Everybody in the house of love  
Hey  
One love - one god

Everybody in the house of love  
Everybody in the house of love  
One love - one god  
Everybody in the house of love

We've got to stop the pain  
And put the the wars on hold  
Let the power of love inside the soul unfold  
Free the mind  
Let it rise above  
We've gotta change this world  
To a world of love  
Mother Earth she's on overload  
One more war and she might explode  
We've got to look back  
And see a love from the past  
We've got time to change it  
But it's running out fast (out fast)

Not bothered about your colour  
Concerned about your creed  
In the house of love - elverybody's free

Everybody in the house of love ...

How many more tears must she cry  
How many more fears must be felt inside  
Before we realise we've gone too far  
The creator created  
We tone it apart

But love can guide us  
Back on the right road  
We've gotta save the planet before she explodes  
We've gotta love our mother

Gotta let her know  
Boom boom - before she blows  
Not bothered about religion  
Not bothered about belief  
In the house of love - everybody's free

Everybody in the house of love ...

Born to live - we live to die  
Our eyes can't see they can only cry  
But our mother's tired of crying she's had enough  
She's gotta surely blow 'cos we're giving up  
Build the house of love while we've got the time  
Too many bombs in the world it's like a living mine  
The house of love is what we must build  
The past won't last  
If the present is killed

Everybody in the house of love ...
