The moons are lost in the sky  
I call in question all the things I saw before  
Invisible spirits hiding the secrets  
Regrets twisting inside my veins

Serpents  
Crawling under my skin  
Wrapping my mind  
Fighting under my skin  
Paralysing my mind  
Chained to a past without future

Disconnected visions pass before my eyes  
Bleeding images flying inside my soul  
Unalterable silence  
I can't even hear my heartbeats  
Ethereal earthquake  
Hits and devastates our hell

Fight for what you will never reach  
And reach out what you thought  
You would never see  
Powerless heartbeats  
Hellish... Earthquake

Endless journey through my life  
Deep inside the blackest hole

Evil demons dancing around me  
They take me back to reality  
Soundless screams and shouts  
They're driving me mad  
Devouring my past
