"Down To Earth"

Visit "[Down To Earth](#)" on MotoLyrics.com

Turn the light out
Another day's ending
Put a load away
Stars are still shining high
All the uninvited, cold hearted, stay foreign
In the beginning
Wore the stars in your stripes
Queen of the home parade
Centre stage passed you by
Fettered gains soak the blood stains
You choke for it

Fell back down to earth and took the first plane
Heading for the fast lane
Fell back down to earth and took the first ride
Heading for the overdrive
Heading for the fire

In the fall out
Found a cold ending
Sooner or later
You're gonna know why
You burn a light for your past like a lone comet

Fell back down to earth and took the first plane
Heading for the fast lane
Fell back down to earth and took the first ride
Heading for the overdrive
Heading for the fire
