"Infested With The Human Disease"

Visit "[Infested With The Human Disease](#)" on MotoLyrics.com

Growing inside it is alive festering inside it has
survived
I was given a human name but inside the demon
remains
I watch the world go by through this human eye I watch
the world go by and I wish it all to die
Misanthropic impulses screaming there will
misanthropic impulses screaming there will
Out of this human mouth they scream kill
I've shed my skin peeled away the layer taken myself
apart ripped out this human heart
Your murdered children live in my chest screaming
and crying they will never rest
Your dead children live in my chest they will never rest
In the darkest of shadows in the darkest of night
My eyes now burn with hell's fiery light
Humanity cannot escape centuries of hate their
stupidity caused this fate now now it's too fucking late
No more morality no more christianity as I rape your
faith you cry blasphemy your tears are as fake as your
sincerity end of your life we consummate with a knife
We consummate with this here Knife!!!! [repeat]
The world is infested with the human disease the only
cure is DEATH
A thousand razorblades all cutting you apart
A million maggots all eating your heart
A million needles all piercing the eye
All your children just grow up to die!
Forever in pain you will remain
Forever insane and in blood we will reign!
