Kids, you're our only hope  
Save us now, we need an antidote  
Kids, get out on the streets  
Through the smoke rise through the city heat

You loved me like a friend  
But now I can't pretend  
The time we used to spend  
Was wasted on you

Police sirens make me deaf  
As I run, trying to catch my breath  
What's the world afraid of now  
We are taught to clap our hands and bow

You loved me like a friend  
But now I can't pretend  
The time we used to spend  
The time we used to spend  
Was wasted on you

Rise through the ashes with a song to remember  
Rise through the ashes with a song to remember  
Rise through the ashes with a song to remember

Kids, you're our only hope  
Kids, you're our only hope  
Kids  
Kids  
Kids
