EDAN:

The true blue fate with an artificial calendar, I be the
balance of the chance like answer,
the dance floor dominator/flavor complicator,
accomidate a greater rate of data fantasia
the soul of a giant; I'm bold and defiant, my science
electrify the unplugged appliance
shoot my television, walk outdoors, and explore, with
the innocence of kids age four
I frolic in the sand with a colony of ants, my particles
expand building oxygen in plants,
from Rakim to Cash, to Lakim Shabazz, I'm logically
advance with the knowledge of the past
motivate a girraffe, wrote a page-and-a-half known for
paving a path, and the waves with a staff
the music is rap, my favorite color is math, the plan of
attack is bless a planet with wax,
the caterer, the Darth Vaderer, the cross-fader; you
should never be afraid of the harm from armed
laborers
we stay patient as we lay the foundation and ascend
the composition for the future generations...

...

(Transition)

MR LIF

Let me introduce myself, a stealth
You seen nothing; you stepped into my realms and
found suffering,
Chaos is turned into seance and burned
calculator versus estimator, spirituality earned
worms leaking out your orifices sort of vicious,
you picked the portal, we just filled the doors with
witches,
take out your spell cast, hell's fast, needles and torture
rags,
torsos hatched, do you want all for that?
Pain, you can't explain landscapes of flame,

flames of inhospitables are crushed in the minerals,
your plans foiled after watching me plant soil, your
pants spoiled throttled in, bottled as Penzoil
Fuel is my ruling, the seeds of my doing, your deaths
will be the pudding that the proof's in, I'm never coolin'
When God took a day off, I had him laid-off, all week,
you wanted concrete to remain soft
Salem's Lot's my vacation spot, often hoppin' out of
coffins steady rockin' while you rottin'
rollin' with a big gang of brothers with fangs,
megadope, use a telescope I'm keepin' my swag...
