Lately I have seen to see you all the time  
And you always seem to find the seat right next to  
mine

I think I can read, the question in your eyes  
It's not hard, I might be dumb, but I ain't blind

If you really wanna know, just how I feel  
Better get up your nerve and begin to talk to me  
If you really wanna know, you can't be shy  
So don't waste any time, you won't know until you try

Everytime you pass me by, you wave and smile  
And a little bird told me I've been on your mind  
You keep asking my friends about me all the time  
Forget my friends, say don't know, but I don't mind

If you really wanna know, just how I feel  
Better get up your nerve and begin to talk to me  
If you really wanna know, you can't be shy  
So don't waste any time, you won't know, until you try

So if you really wanna know, just how I feel  
Better get up your nerve and begin to talk to me  
If you really wanna know, you can't be shy  
So don't waste any time, you won't know until you try

So don't waste any time, you won't know  
If you really wanna know, just how I feel  
Don't waste any time, you won't know until you try
