I see a beautiful rainbow even on the days it doesn't  
rain  
And for me December will be thirty one days of spring  
Loneliness has moved away and happiness moved in  
to stay  
And life has been extasy since you've been loving me

You turned the skies into a bluer blue  
The trees are all a greener green  
You've changed everything  
With you in my arms any longer have to dream  
If I could be a symphony then you would be my melody  
And everything I hear and see since you've been loving  
me  
Since you've been loving me
