Wake up, my love  
Today I heard some bad news  
Just what are we all supposed to do?  
I won't let them get to you

I don't wanna go out on my own anymore  
I can't face the night like I used to before

Take my well worn hand  
Let's lock ourselves away  
We'll never, ever step outside  
We'll curl up in a ball and hide

I don't wanna go out on my own anymore  
I can't face the night like I used to before

I don't wanna go out on my own anymore  
I can't face the night like I used to before  
I'm so sorry for the things that they've done  
I'm so sorry about what we've all become
