whats up baby? its me and...

my plane leave for kenya in the morning

i wanted to see before i left,

but you're not home

well this is finally my big break, wish me luck

and um i want you to know

that no matter where i am or what im doing

ill always love you...bye bye!

1

good bye, its time for me to go

ill call you in the morning, so i can let you know

the way you really feel boy, put your mind at ease

i dont think i will, if i make it ill still want you to be here
with me

2

ill be there one day and you will be right next to me

ill be there one day and you will be right next to me

right here next to me

3

i wonder will you be where i am? baby

will you be by my side boy?

or with another girl?

just wait a little longer, boy i dont know how long

just try to understand, this is not what i planned

im so sorry this had to be

repeat 2

4

boy oh boy for every man theres a woman

every man needs a woman

it's your lovin that i choose and i cant afford to lose you
baby

thats why i swear, i swear to the world

ill always be your girl just say you'll be...

right next to me

repeat 2 until fade
