welcome to love & pop

get ready for the shock

'cause it'll never stop

u've tried to break me down

now look who's on his knees

i leave u to ur world of pain

u've tried to tear me down

now who's gone with the breeze

look at me, here I come again

let ur body feel the groove (i'll be there)

let my soul control ur move (i'll be there)

u should know by now

i'm here and there

everywhere

welcome to love & pop

get ready for the shock

'cause it'll never stop
