The silence, of this place
Our excistance has no trace
We're facing something new here
My love, and I'll not waste this moment.

Lets enjoy before the sun shines, it's invasive
demeanor on us.
Lemme hear those words that I've tried to trick you into
saying

Will silence be the only thing I'll ever hear from you?
And now's the moment of truth,
Serenity has faded
I'm looking at you, are you gonna blurt em out now?
Maybe I've been expecting too much from you.

Lets enjoy before the sun shines, it's invasive
demeanor on us.
Lemme hear those words that I've tried to trick you into
saying

I just can't remember
I don't know
I can't feel

Chorus

I just can't remember
I don't know
I can't feel

(Obvert every drop of this, into what love is
Instill in me the memory of how it's supposed to be)
