Take me to your starship  
We will ride the milky way  
We can take a spin at the rings of saturn  
Pass the rays of the sun and stray away  
Gasping for the air in the emptiness of space  
Just to reach you reach you, reach you on the star you  
came from  
Pass the clusters of asteroid to see the light of aurora,  
Lets sit back and bask in it's aweness

Taste the fires of mars  
Frigidity of pluto  
Lucidity of mercury  
There's no hurry  
Beauty of venus  
Beauty of venus  
Gasses of uranus  
There's no end for here we go  
Past the bounds of this endless universe

Please stay  
Please stay  
Please, I beg of you  
Can't you see I'm crying infront of you  
Please stay  
Please stay  
Please I beg of you  
You see your too far to reach
