I've had enough, I'm taking you down
Taking you down

You've been all up in my face
Out of line and out of place
Blurring views, distorting facts, every time I turn my
back

I'll make you know your position
Don't talk, just shut up and listen
No way out, now you can't play dumb
Get up get up and come get some

(Chorus)
I've had enough, I'm taking you down
Taking you down
I've had enough, I'm taking you down

Taking you down

I feel the hate that you breed
It's the fix that feeds your greed
Set your bait, set your trap
Take a seat and watch me snap

I'll shake the ground that you stand on
I'll still be here when you're long gone
This world is mine you can't have it
It's my turn to wreak havoc.

(Chorus)

Down, down I'll take you down
Down I'll take you down down
I'll take you down
