Balled up - enter the pain  
Fists of fury - the deafening blows  
Ridiculed by drunken rage  
Unleashing the beast within

Repeated sickness - pray in vain - to be denied  
Mental scars that never heal - in quiet misery

Huddled in darkness - a wide-eyed nightmare  
Together - maintain a sense of sanity  
To speak the truth - intensified hatred  
The mind takes you to a better place

Repeated sickness - pray in vain - to be denied  
Mental scars that never heal - in quiet misery

My god - what is this pain? Why must I feel so alone?  
What makes him release all this pain? A family torn to shreds  
Secretly unified - in hatred and vengeance -  
For years of torment and misery  
Now I live for the day - for us to see eye to eye  
You stand before me and then you die - for mental scars never heal!

Solo

Horrified coward - forgotten my face?  
Intensifying - my chance to repay  
Praying to god you now scream MY name  
Vengeance is mine, the last breath you take

Repeated sickness - pray in vain - to be denied  
Mental scars that never heal - in quiet misery
